About DEVONtechnologies

DEVONtechnologies creates end-user and server applications for the Mac and iOS platforms that enhance productivity, organization, and user experience with unique artificial intelligence technology. Headquartered in the US.
Objective - Grow Affiliates Revenue

Avangate provided DEVONtechnologies with a total commerce solution including shopping cart localization and optimization, back-end support – fulfillment, product management, reporting, shopper support, as well as access to the Avangate Affiliates Network.

DEVONtechnologies were looking to jumpstart their online initiatives, and, specifically, leverage Avangate’s expertise to acquire more top-performing Mac-centric affiliates and put in place a strategy to grow revenues through the Affiliates network.

Context - Case of the Missing Mac

While Apple computers are wildly popular with consumers, selling software for the platform is still mainly a niche affair. With its Mac-centric products and focus, DEVONtechnologies requires a distinctive ecosystem of partners to help it reach and grow its global customer base.

Challenges - Low Mac Emphasis & Resources

- Small number of quality affiliates specializing in Mac software sales. DEVONtechnologies was challenged to identify affiliates with a Mac section or emphasis.

- Average order value sold through affiliates was lower than desired, due also to the quality of existing relationships.

- Lacked internal resources to focus on additional marketing activities. Needed to update online store, ensure brand consistency across all channels and automate and manage promotional programs.
