The Need for Localization

Use local payment methods in conjunction with localization best practices to simplify payments for your international shoppers. But do so keeping in mind the full customer journey from acquisition and conversion through to activation and ultimately retention.

Domestic payment methods and Alternative Payment Methods (APMs) are a critical resource to optimize the transactional processes across the entire customer lifecycle. They fit in the complex puzzle of challenges that includes language and cultural differences, multiple currencies, taxation, user behavior particularities, device and form factor preferences, risk mitigation, legal and regulatory compliance, etc.

Just keep in mind that APMs can make international customers feel sufficiently “at home” in your shopping cart to result in successful purchases.

2Checkout Billing Currencies

You have up to 100 display and billing currencies available, depending on your region.

2Checkout tailors the way in which shoppers see prices in their local currencies, according to the conventions in their country.

2Checkout supports three currencies for payouts for all merchants – USD, GBP or EUR – with 2 more available on request. More may sometimes be activated based on request and availability.

About 2Checkout (now Verifone)

2Checkout (now Verifone) is the leading all-in-one monetization platform for global businesses built to help clients drive sales growth across channels and increase market share by simplifying the complexities of modern commerce. 2Checkout's digital services, including global payments, subscription billing, merchandising, taxes, compliance and risk, help clients stay focused on innovating their products while delivering exceptional customer experiences.

In August 2020, leading global payments solution provider Verifone acquired 2Checkout, further solidifying its commitment to providing seamless and frictionless experiences to customers globally through innovative and next-generation hardware and cloud services. 2Checkout will become Verifone, and the unified company will enable omnichannel commerce wherever and whenever clients shop.
