Overview

Apple Pay provides an easy and secure way to make payments in iOS apps, watchOS apps, and websites on Safari. Nonprofits can accept donations within their apps and websites with Apple Pay. By using Face ID, Touch ID, or double-clicking Apple Watch, users can quickly and securely provide their payment, shipping, and contact information to check out. Customers love the simplicity of Apple Pay, and you'll love the increased conversion rates and new user adoption that come with it.

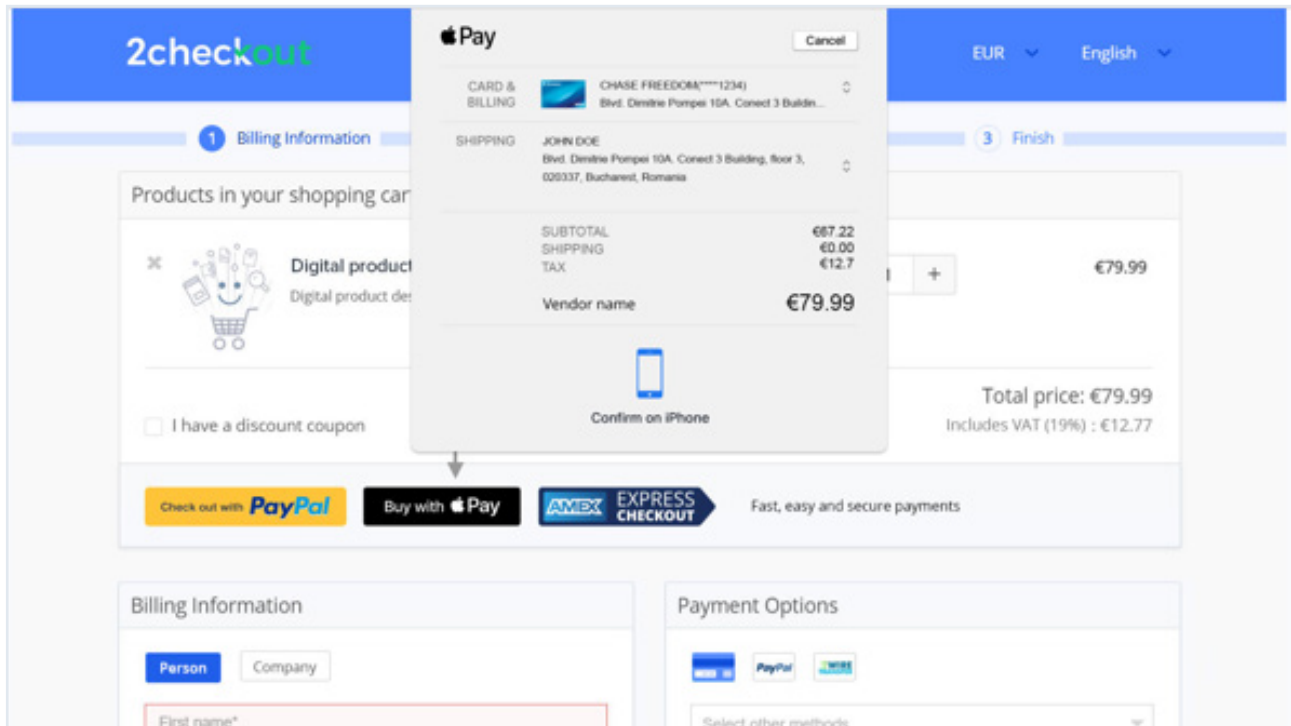

Purchase flow

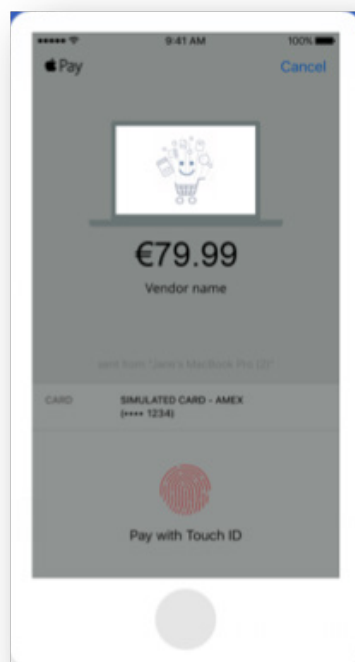

1. When the user access the cart, Apple pay will be available on the upper part of the page along with the express payment options
2. The shopper will click on the on the **Buy with Apple Pay** button

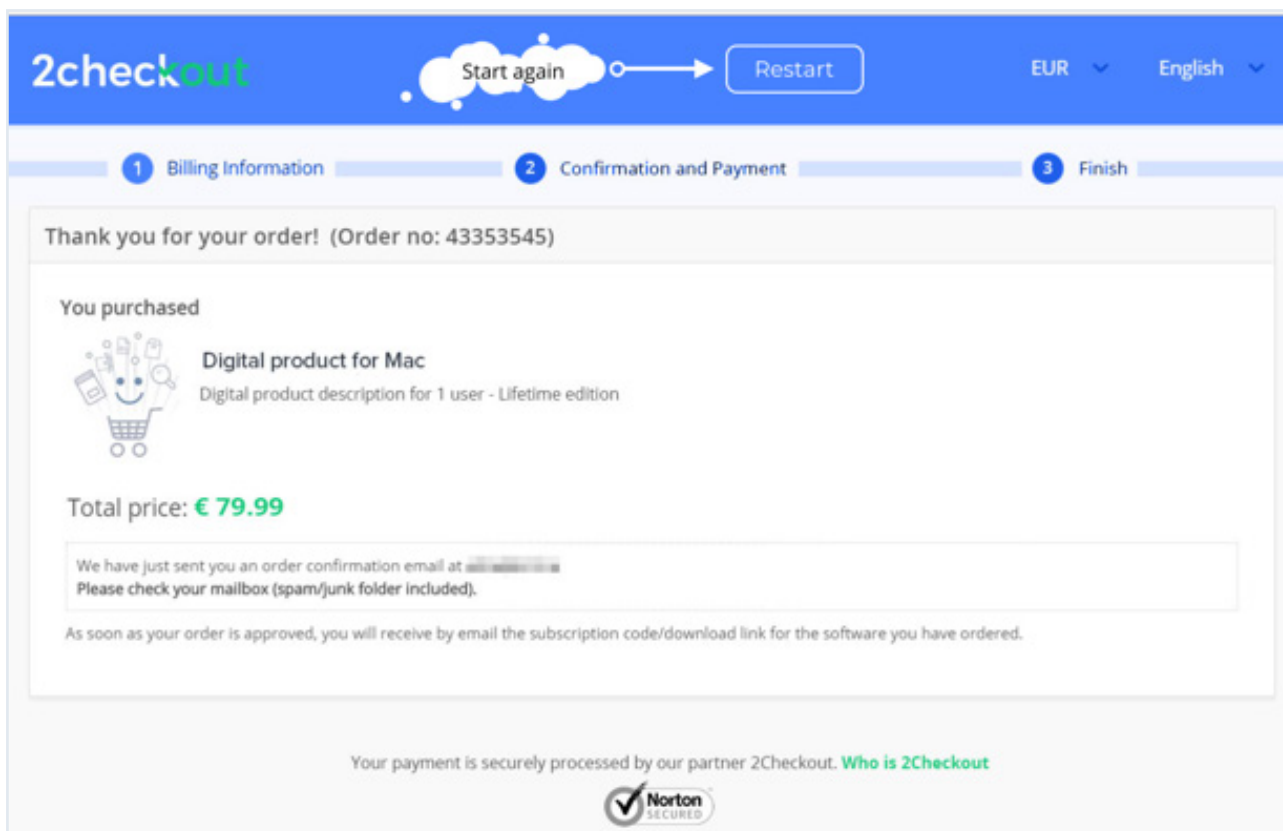

3. A browser popup will open that will contain the shopper details. Simultaneously a request will be sent to the registered mobile device **iPhone, iPad or iWatch**

4. The user needs to confirm the transaction

5. Once the order is confirmed by the shopper, the cart will automatically fill in the billing and delivery information and the payment details and it will proceed to processing the payment automatically. Once the order is successfully placed the shopper will be redirected to the thank you page.

Availability

Apple Pay is available for all 2Checkout accounts on the Avangate Monetization Platform and it is supported by DESIGN_TYPE=2 Express Checkout payment flows.

Middle East & Africa

 United Arab Emirates
--

Latin America

 Brazil
--

Apple Pay is constantly updating the list of supported countries. For the latest coverage, please consult the [Apple Support page](#).

Costs

Using Apple Pay does not incur any additional costs on top of the existing 2Checkout commission on the Avangate Monetization Platform.

Benefits

1. Apple Pay is already a popular payment method for both offline and online retail transactions. Offering it to your shoppers provides a definite advantage.
2. Simplified design. A friendly and easy to use interface keeps shoppers focused on what matters most, completing purchases in only a few clicks.
3. Cross-platform support. The fast checkout experience is consistent across platforms and devices, even if your shoppers use computers, tablets, or smartphones. Since mobile commerce is increasing, the checkout experience is optimized for mobile screens.
4. Multiple Security Levels (“Tokenization”). When consumers store credit card data in the Apple Wallet app, their identities will be verified at the point of purchase with the Touch ID sensor. Either a series of beeps, pulses or vibrations (iPhone) will confirm successful payment.

F.A.Q.

Q: What devices are supported by Apple Pay?

A: Apple pay is available on the following devices

iPhone & iPad: iPhone X, 8 / 8 Plus, iPhone 7 / 7 Plus, iPhone 6S / 6S Plus, iPhone 6 / 6 Plus, iPad Air 2, iPad mini 3, iPad mini 4, iPad Pro with iOS 10 or later installed;

Mac: All the Macs with macOS Sierra or later installed but only available via an iPhone X, 8 / 8 Plus, iPhone 7 / 7 Plus, iPhone 6S / 6S Plus, iPhone 6 / 6 Plus, iPhone SE or an Apple Watch / Apple Watch Series 2 and only via Safari

Q: What card networks are available in Apple Pay?

A: Supported networks: Visa, V Pay, Mastercard, Maestro.

Q: Does Apple Pay for work on other devices

A: No. It only works with Apple devices.

Q. Will pop-up blockers prevent the Apple Pay window from being displayed?

A: No. Since the popup is generated by the browser it will not be blocked.

About 2Checkout

2Checkout is the leading all-in-one monetization platform for global businesses.
